c-Systems Software, Inc. assumes no responsibility or liability for any errors or inaccuracies that may appear in this document.

Unless otherwise noted, all names of companies, products, street addresses, and persons contained herein are part of a completely fictitious scenario or scenarios and are designed solely to document the use of a c-Systems Software, Inc. product.

Use of manufacturer and products in the examples within does not constitute an endorsement by those companies.

c-Systems to Echo EZ-Link Interface

Enterprise and Classic Systems

April 2012

The new EZ-Link software will automatically submit the equipment registration information for Echo and Shindaiwa during the ENDDAY cycle. Once submitted, you may access the Echo website and confirm the information. This saves the time and effort required to manually register your Echo and Shindaiwa equipment sales.

A video illustrating the setup process is available on the www.csystemssoftware.com website and clicking the Echo EZ-Link banner.

NOTE: The EZ-Link transmission process requires internet connectivity to the c-Systems servers. If you do not receive price updates and monthly updates electronically, this process will not function. Do not install the EZ-Link software.

Setup Procedure

1. Install any software required by Echo following their instructions (none required in this instance).
2. Requires map to the catcon drive.
3. Access the c-Systems main menu.
NOTE: This process must be run in each store on multi-store systems.
4. Type ECHOON in the 'Programs' field and press <ENTER>.
5. Type "YES" and press <ENTER> to accept the conditions and begin the setup procedure. Leave the field blank and press <ENTER> to abort the process.

```
Ez-Link™                Ez-Link™ Echo/Shindaiwa Product Registration
-----
This program will enable the transmission of your company's Echo/Shindaiwa
Product Registration data for products you will choose to send to ECHO Inc. This
information will be retrieved by c-Systems and forwarded to ECHO Inc. If you
choose to send this information type YES and the process will begin
automatically with your next End-of-Day.

ATTENTION: By accepting this you agree to share the selected Product
Registration data on a real time basis with ECHO Inc. through c-Systems.

Enter YES if you want to send data or press ENTER key if you do not. [  ]

```

Ez-Link™                  Ez-Link™ Cross Reference
-----
1. Product Code
2. Customer Category
This screen connects your Customer Types to the Customer Types used by ECHO Inc.
so that residential or commercial use can be identified. Additionally, invoices
that should not be registered ( i.e. dealer to dealer transfers) can be
prevented by linking your customer types such as "reseller" to the Ez-Link™
"Do Not Register" customer type.
3. Ez-Link™ Account
Enter the dealer number assigned to you by ECHO Incorporated. This is NOT the
dealer number assigned by your distributor. To locate your ECHO dealer number,
please log in to the ECHO Dealer Distributor Website and view your profile.
0. End
Selection:[ ]
    
```

6. The c-Systems EZ-Link Cross Reference menu appears. This program is used to designate the Echo and Shindaiwa product lines and create the required EZ-Link to c-Systems customer category links.

NOTE: After the setup is complete, use ECHOFM to return to this program for any necessary changes.

Select item #1 (Product Code).

```

```

7. Select "A" to automatically populate the list with product lines having descriptions which contain Echo or Shindaiwa. Use the 'Change' function to add or delete product lines as necessary. Press the Space Bar in the 'Line' field to erase an entry.

Verify all product lines are correct before continuing.

Type "E" and press <ENTER> to continue to the next step.

[4]	18. DISTRIBUTOR				
[4]	19. DEALER				

Selection _ Change, End

9. Type "C" and enter the EZ-Link category number in the field to the left which best corresponds to the c-Systems customer category.
This designates the categories that compile and send registration and other data to Echo.

Select the best category based on how the equipment will be used and the applicable warranty terms. For example; the Residential category could include "homeowner", "employee", and others such as "farm" if the equipment will be used more as a personal item.

IMPORTANT NOTES:

- a. The Warranty, Temp. Charge, and 90-99 categories must be set to Echo category #4 "Do Not Register".
- b. Categories which are not end users (retailers, other dealers, etc.) must be set to Echo category #4 "Do Not Register".
- c. **All** fields must have a corresponding Echo category number even if there is no description.
- d. The screen above is for illustration only and is not intended to be used as a guide for your cross reference.

Type "E" to end the category cross reference program after all entries are complete.

c-Systems to Echo EZ-Link Interface

Enterprise and Classic Systems
April 2012

Setup Procedure (continued)

10. Select Item #3 (EZ-Link Account) from the Cross Reference menu.

```
Ez-Link™                ECHO Inc. ACCOUNT
-----
Enter your ECHO Inc. Account Number : 123456
```

11. Enter the dealer number assigned to you by ECHO Incorporated.
This is NOT the dealer number assigned by your distributor. To locate your ECHO dealer number, please log in to the ECHO Dealer Distributor Website and view your profile.

```
GASETMAP                Set Store Address
-----
Enter your Company Address Below
Street [                ]
City   [                ]
State  [  ]
Zip    [      ]
```

12. The screen above appears only if a required address file does not exist. Enter the store address information and press <ENTER> to continue.

c-Systems to Echo EZ-Link Interface

Enterprise and Classic Systems
April 2012

Setup Procedure (continued)

```
BUILD EZ-Link™ Invoices BY INVOICE RANGE, DATE RANGE or STANDARD MM/DD/YY
-----
                                BUILDING FILES -- PLEASE WAIT
                                SELECT BY INVOICE OR DATE RANGE or STANDARD [I,D,S][S]

                                Process complete... press ENTER to return to Main Menu
```

13. The screen above appears with "S" as the default entry. The system is automatically building the required files, **do not press any key until the build is complete**. The time required to build the data file depends on the speed of the system and the number of records for the program to process. When the "Process complete" message appears, press <ENTER> to return to the main menu. The setup process is complete. The Echo data compilation and transmission begins with the next ENDDAY run.
