

# Why Choose c-Systems?

- **Technology:** c-Systems has the most advanced, leading edge business management software in the industry. Utilizing the latest Windows technology, including .NET and SQL Server, we have become the leader in providing solutions that automate operation, maximize efficiency and boost business profits.
- **Easy to use:** c-Systems' applications are very "User-Friendly" and extremely powerful. Exclusive "Information Panels" make locating, editing and reviewing information remarkably simple to even the most novice user. Complex operations are made easy with thoughtful design.
- **Experience:** c-Systems' software was developed with nearly 30 years of experience and feedback from thousands of customers, industry vendors, distributors and suppliers. We listen to our customers and our industry partners so we can provide the best business management system available today.
- **Integration:** c-Systems integrates your entire business through advanced technology and enables all of your business operations to work together. Point of sale, inventory, wholesales, units, repair center/service department and financials -- everything is entered ONE time and distributed to the appropriate applications throughout your entire program!
- **Support:** Any business management system, no matter how well designed, is only as good as the support staff behind the system. With c-Systems, you get the best and most experienced support in the industry. More than half of our support personnel have been with the company for more than 10 years and have direct experience working in, or managing businesses such as yours. We do not rely on outside, fee-for-hire or third-party consultants to train, assist or help our customers. Our personnel understand how your business operates and have the knowledge to help when you have a problem. You can be assured that when you speak to someone at c-Systems, they understand the product, the industry and how to help you.
- **Training:** When you purchase from c-Systems, a professional trainer will come on-site to guide you and your personnel through software configuration and the training process. Once installation is complete, convenient and frequently-scheduled Web-based training classes are available to keep you and your personnel up to date. Advanced training is also available on your site or at our company location.
- c-Systems has a complete business solution, designed to help you manage every facet of your business. Hardware, software, services and forms, our business management software will help provide greater efficiency, more profits and fewer headaches.

c-Systems Software, Inc. is the preferred choice of more dealers than any other business system.
